General Description

The Atlas A-Line ELI Line array speaker system is a highly intelligible, high efficiency speaker system that is ideally suited for use in speech and music reproduction applications for small venues such as houses of worship, small theaters, and schools. The system consists of two parts: the EL1503-B, which includes fifteen proprietary 3" drivers, and the ELW110, which has a single 10" low frequency driver. Both models utilize an optimally designed Baltic birch constructed enclosure. The ELW110A-B houses an integrated class D amplifier that includes onboard DSP. The ELW110A-B is designed to provide power to the ELW110X-B and the two EL1503-B arrays. The trim line, two cabinet design allows for sleek, clean looking set ups with minimal sightline interference. This kit includes everything needed to set up the system, including the power cable, speaker cables and pole.

This package sku includes two (2) EL1503-B, one (1) ELW110A-B, and one (1) ELW110X-B.
