SOUND MASKING SOLUTIONS

Sound masking systems protect private conversations, reduce distractions, and enhance employee productivity and satisfaction in applications such as open offices, health clinics, legal offices, and call centers. AtlasIED offers a full array of sound masking solutions from self-contained devices to large enterprise-wide systems.

FEATURES/BENEFITS

Improve Workplace Acoustics

Improve employee productivity. Enhance employee satisfaction. Reduce employee turnover.

Assist in HIPAA compliance

HIPAA (Health Insurance Portability Accountability Act) regulations require safeguard of medical and confidential information by all reasonable means.

Protect Confidential Conversations

Sound masking can prevent people in specific areas from hearing conversations that are not intended for them.

Reduce Build-Out Costs

Sound masking systems are more affordable than other structural methods of managing distractions and creating privacy.

Overcome Designs Challenges

Can accommodate any size space from 100sq ft to millions of sq ft, including various ceiling heights and other architectural variables.

Efficient Multi-Functional Systems

Solutions that can be installed for a full compliment of audio requirements including sound masking, paging, and business background music.

🕲 Atlas IED 🔟

AtlasIED sound masking solutions include various speakers, amplifiers, generators, and processors to accommodate any design size or challenge from small, single spaces to large, open concept floor plans.

SHS-3T2

AtlasIED's SHS-3T2 Strategically Hidden Speaker, a 2.25" full range speaker with multiple mounting options (in-ceiling, wall/surface mount, or pendent mount), offers a compact design with minimal visual intrusiveness. SHS-3T2 is perfect for paging, background music, or sound masking applications. Additionally, when used with an AtlasIED Z-Series High-Definition Acoustical System, the speakers can be daisy chained to the Z-Series source unit using Cat5e cable for an easy to install, cost effective complete sound masking solution.

M1000R-W

The M1000R-W is a perfect solution for contemporary office spaces where open ceiling architecture allows the speakers to be visible. The sleek, round design and low gloss white finish (also available in black) blends in nicely with painted ductwork, lighting, and other devices suspended in the open plenum. The M1000R-W is also UL 1480 & 2043 listed just like the M1000 sound masking speaker for closed ceiling applications.

Z SERIES

An all-in-one solution for corporate offices, health clinics, and hospitality applications that supplies high quality indirect or direct field sound masking as well as background music and paging. The Z Series is available in 2 or 4 zone models and includes a multitude of features, such as onboard DSP, to conform to most design requirements but remains intuitive enough for simple user operation and quick installation. Privacy engage feature allows a user to instantly turn sound masking on or off with the flip of a switch in conference rooms, law offices, and health clinics.
