# IntelliSee®

## AI POWERED THREAT DETECTION AND RISK MITIGATION SOFTWARE

IntelliSee's AI-powered risk mitigation platform helps schools, hospitals, and businesses strengthen their approach to organizational safety. The IntelliSee platform proactively protects against day-to-day risks including slipping hazards, fallen persons, trespassing, loitering, and un-authorized vehicles as well as more critical incidents such as weapon detection and violent acts. When overlayed with existing video surveil-lance systems, IntelliSee continually monitors live camera feeds to detect threats in real time. Once a threat is detected, instant alerts provide pre-determined stakeholders with the situational awareness and context needed to act quickly to prevent harm. IntelliSee is offered through AtlasIED as part of its security technology solution which includes IPX series of IP endpoints and InformaCast mass notification software

## FEATURES

**24/7/365 Monitoring**
IntelliSee artificial intelligence software monitors your environment by analyzing, in real-time, all of your digital camera feeds. It provides reliable oversight and risk notification all day every day to keep your facility safe and secure.

**Seamless Integration**
IntelliSee uses a simple, non-disruptive connection to monitor real-time footage across multiple cameras with no downstream impact. The software integrates smoothly with all major VMS manufacturers.

**Affordable Security Enhancement**
IntelliSee AI software integrates with all major commercial security camera brands to increase the value and ROI of your existing surveillance camera investment by adding affordable AI monitoring and alerting.

**Detect a Variety of Threats**
More than just weapon detection, IntelliSee also defends your organization against more common safety risks such as trespassers, unauthorized vehicles, building leaks, slip/fall risks, loitering, and fallen persons.
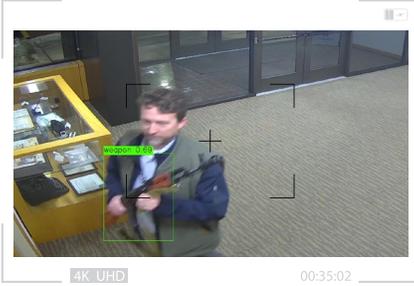

**Constant AI Learning**
IntelliSee's deep-learning AI constantly evolves and improves through self-learning algorithms which are trained against a growing database of incidence footage.

**Customizable Parameters**
Setup your system for your own use and application. Everything from establishing geofencing to setting probability thresholds to who and how alerts are distributed can be set to your specific needs.

## IntelliSee in Action

Autonomous threat detection to proactively prevent incidents and to speed response.

**ALERT - Weapon Detected**

Detect drawn weapons before shots are fired to avoid a potentially catastrophic situation.

**ALERT - Slip Risk Detected**

Mitigate slip and fall risks before an incident.

**ALERT - Trespass Detected**

Detect trespassers or loitering in specified locations, dates and times.

## A Smarter, Proactive Approach

**One simple platform detects multiple risks from the common to catastrophic**
IntelliSee adds a complementary layer of security to your surveillance without adding personnel, disruptive renovations or expensive updates.
