General Description

The AtlasIED A-Line Eli Line array speaker system is a highly ineligible, high efficiency speaker system that is ideally suited for use in speech and music reproduction applications for small venues such as houses of worship, small theaters, and schools. The system consists of two parts: the EL1503C, which includes fifteen proprietary 3"drivers, and the ELW110, which has a single 10" low frequency driver. Both models utilize an optimally designed birch constructed enclosure. The ELW110AC houses an integrated Bang & Olufsen ICEpower tm class D amplifier that includes onboard DSP. The ELW110AC is designed to provide power to the EL110XC and the two EL1503C arrays. The trim line, two cabinet design allows for sleek, clean looking set ups with minimal sightline interference. This kit includes everything needed to set up the system, including the power cable, speaker cables and pole.
