## DMA & LMA AMPLIFIER BLUETOOTH RECEIVER WALL PLATES

### TECHNICAL DATA SHEET

### PRODUCT SUMMARY

The AtlasIED DMA-BT and WTSD-BT are part of the DMA Digital Mixer Amplifier accessory line and the WTSD active wall plate series. Two versions of the Bluetooth receiver wall plate are available: the DMA-BT, which connects directly to a DMA amplifier, and the WTSD-BT, which connects to any audio system with a balanced line input. Both models use the same Bluetooth receiver wall plate and integrate seamlessly with audio systems.

The DMA-BT connects to the DMA amplifier using an installer friendly, color coded system that utilizes industry standard CAT5/6 cabling and RJ45 connectors. The WTSD-BT functions as a universal Bluetooth receiver and requires a PWBOB analog interface box and external power supply to operate. Wall controllers can be installed up to 330 ft (100 meters) from the amplifier, providing flexible placement options.

Both the DMA BT and WTSD-BT use commercial-grade 5.1 Bluetooth technology featuring ultra-low noise performance, long-range connectivity, no auto-connect function, and a quick disconnect bump feature. The Bluetooth Discovery ID can be customized through the DMA App. Installation meets low voltage standards and is straightforward, with the wall plate fitting into a standard single gang electrical box or low voltage ring and requiring only 1.5 inches (38 mm) of clearance depth.

The AtlasIED WTSD proprietary low voltage bus is designed to support a single wall plate or multiple WTSD devices. Up to three WTSD devices can be daisy-chained on the same bus, with audio from each device summed together while maintaining independent control.

The DMA-BT includes an onboard signal limiter to manage the level placed on the summed bus, with adjustable settings from -3 dB to 21 dB. The DMA-BT faceplate provides signal and limiter status indicators.

### KEY FEATURES

- Bluetooth audio receiver
- Customizable Bluetooth discovery name
- No last user auto-connect
- Bump disconnect function
- Color-coded RJ45 interface with DMA series amplifiers
- Utilizes standard Cat5/6 Cable
- Onboard output limiter
- Signal and limit indicator
- Meets low voltage electrical codes
- Fits into 1-gang electrical boxes or low voltage rings
- Can be mounted up to 100 meters from a DMA series amplifier
- Linkable with other WTSD units on the same bus
- WTSD-BT version features interface for connecting to WTSD mixers
- High-gain balanced line output for long distance applications up to 100 meters

### APPLICATIONS

The AtlasIED DMA and LMA Series Amplifiers provide flexible one- or two-zone audio system design, and when paired with DMA-V or DMA-VS wall controllers, the remote level control and source selection provides a streamlined user experience.

- Restaurants
- Presentation rooms
- Retail background/foreground music applications
- Indoor sports complexes
- Schools — gymnasiums, rally areas, classrooms
- Hotels — ballrooms
- Community multi-use facilities
- Industrial facilities
- Coffee shops

### SPECIFICATIONS/PERFORMANCE

System	
Model	DMA-BT
Type	Audio Bluetooth Wall Plate Receiver
Model	WTSD-BT
Type	Audio Bluetooth Receiver Wall Plate & Interface Kit
WTSD Kit Contents	DMA-BT Bluetooth Receiver, PWBOB (Injector), External 24 VDC, 500 mA Power Supply
Inputs - DMA-BT Wall Plate Receiver	
Bluetooth Receiver	
Bluetooth Input	Ultra-low Noise, Long Range Connectivity, No Auto-Connect and Quick Disconnect Bump
Input - Bluetooth Stream	Bluetooth 5.1, Commercial Grade
BLE (Bluetooth Low Energy)	Used for device discovery and Bluetooth ID renaming via the DMA-App
Location	Front Panel
DMA-BT Bus Input	
Input Type - Bus (Proprietary)	(IN) from DMA-ML, WTSD-MIX31, WTSD-MIX41. (Supports any three of these devices daisy-chained – sums audio signal)
Connection	RJ45 (Black)
Audio	Analog Balanced Line (part of bus)
Location	Rear Panel
Network	No. Proprietary WTSD bus.
DMA-BT Bus Output	
Output Type - Bus (Proprietary)	(OUT) to DMA Amplifier WTSD Input, WTSD-PWBOB or WTSD-PWHUB
Connection	RJ45 (Black)
Interface Component	(OUT) to interface with DMA Amplifier WTSD Input, WTSD-PWBOB or WTSD-PWHUB
Network	No.
Controls - Front Panel	
DMA-BT Connect/Disconnect	
Function	Bluetooth Pairing and Override Disconnect
Switch Type	Push, Momentary
Bluetooth Functions	
Bluetooth ID Name	DMA-BT (default). Can be changed via DMA-App.
Momentary Switch - Connecting	Bluetooth pairing and connection
Bluetooth Stream Disconnection	Override Disconnect – terminates any Bluetooth connection.
Last Auto Connect	No
Out-of-Range	Attempts to reconnect within 30 seconds
Bluetooth Range	100 ft. (30 m) minimum – line-of-sight

**Notes:**

- 1 - Average current draw, watts, and Btu are based on one DMA-BT or WTSD-BT. For each additional WTSD or DMA-BT/ML added in series, calculate the total draw. Examples:  
Two WTSDs=104 mA of DC current draw.  
Three WTSDs=156 mA of DC current draw.
- 2 - Electrical box requirements. For additional information, refer to manual for recommended box types.

### ARCHITECT AND ENGINEER SPECS

The Bluetooth receiver wall plate shall be the AtlasIED DMA-BT or WTSD-BT, designed as part of the AtlasIED DMA Digital Mixer Amplifier accessory line and WTSD active wall plate series. The device shall provide wireless audio input via commercial grade Bluetooth technology featuring low noise performance, extended range connectivity, no auto-connect functionality, and a quick disconnect bump feature. The Bluetooth Discovery ID shall be field configurable through the DMA App.

The DMA BT model shall interface directly with AtlasIED DMA Series amplifiers using a color coded connection scheme with industry standard CAT5/6 cabling and RJ45 connectors. The WTSD BT model shall function as a universal Bluetooth receiver capable of integration with any audio system utilizing a balanced line level input and shall require a PWBOB analog interface box and external power supply.

Both models shall utilize the same single gang Bluetooth receiver wall plate, suitable for installation in a standard single gang electrical box or low voltage ring with a minimum depth requirement of 1.5 inches (38 mm). Wall plates shall support cable runs up to 330 ft (100 m) from the associated amplifier or interface device.

The WTSD BT shall operate on the AtlasIED proprietary low voltage WTSD BUS, supporting up to three daisy chained WTSD devices with summed audio and independent device control. The DMA BT shall include an onboard signal limiter with adjustable settings from -3 dB to +21 dB to regulate signal contribution to the summed bus. The DMA BT faceplate shall include signal and limiter status indicators.

Dimensions for both wall plate models shall be the same with the (Height) 4.67" x (Width) 2.95" x (Mounting Depth) 1.1" (119 mm x 75 mm x 28 mm). Weight shall be 0.45 lbs (0.2 kg).

The AtlasIED accessory wall plate shall be the DMA-BT and the WTSD-BT.
