

GLOBALCOM[®].EDU

Pre-Loaded Factory Configured Features

Name	Description	Benefit
All-Call Auto Registration	IP endpoint devices automatically register in the all-call zone.	During an unexpected emergency alert, all online devices will push the vital notifications automatically.
Default Bell Schedule	A typical bell schedule is configured and active.	Start with a typical setup and easily modify for quick deployment.
Quick Schedule Replacement / Adjustment	Change a schedule without accessing GCK software by calling a phone extension and choosing the prompt associated with the schedule requested.	Quicker scheduling changes by anyone with permissions access makes early-release and in-service days easier to manage.
Default Classroom IP Endpoint Group / Profile	Classroom zone group with call request and emergency button are configured.	All IP Endpoints installed in the classrooms will have default communication settings.
Default Lockdown Alerts	A lockdown emergency event is configured with automated announcements and an all-call zone.	Critical alert automation is immediately available upon system activation.
Smart Alerts For Emergencies (S.A.F.E. [™]) Plugin Ready	S.A.F.E provides system administrators with an immediate visual method to centrally monitor a situation when a critical alert happens anywhere in the school campus.	A new method to visually confirm which zones are secured and which ones have not responded during a lockdown. Emergency responders can immediately view which zones within the school require assistance.
Default School Audio / Visual Message Library	A rich library of professionally recorded audio and visual messages relevant to educational institutions	Quickly choose pre-recorded messages from templates provided.
Messaging Priority (Announcement Class)	Pre-configured list of priority levels for messages defines which messages have highest priority.	Start with a typical setup and easily modify to meet exact operational practices.
Default Zone Groups	Pre-configured zone groups for typical school topography including hallways, cafeteria, athletics, classrooms, corridor, outdoors, etc.	Reduces system deployment timeline. All zones are pre-programmed for faster install.
Default User Rights	Pre-configured user groups with priority levels for admin, principle, teachers, and faculty.	Start with a typical setup and easily modify for quick deployment.
