

MMK-IPM

IP Module for MMK-KVM8

Atlas Solutions

The MMK-IPM switch redirects local keyboard, mouse and video data to a remote administration console. It allows you to control one or many computers locally at the server site or remotely via the Internet using a standard browser. You can securely gain BIOS level access to systems for maintenance, support, or failure recovery over the Internet. Communication is secure via SSL encryption. Use in conjunction with a MMK-KVM8 switch for multiple-server access.
