

IMPORTANT NOTICE

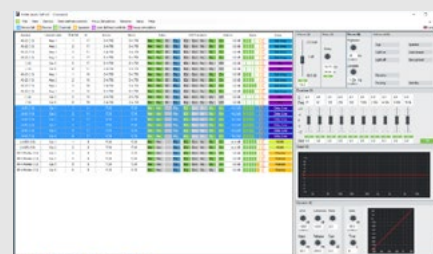

FOHNN-NET CONFIGURATION

Please note: In a FOHNN-NET setup, each ID can only occur once. You should therefore give each of your system devices a unique ID before networking them together.

Devices with displays can have their **FOHNN-NET IDs** changed directly under **Setup -> Network**. Devices without displays must have their **FOHNN-NET IDs** changed via Fohhn Audio Soft. In the **Search Device / Network Scan** dialog, open the context menu by right clicking. Then click on **Change Fohhn-Net ID**.

ID	Device	Version	Node
17	D-4.750	2.12.10	USB FNA10000 (Isolated Fohhn-Net)

From device ID: 1 To device ID: 20 Scan 1 / 1 devices selected Add all devices OK Cancel

You can download the latest version of **FOHNN AUDIO SOFT**, a detailed user manual and a manual for **FOHNN® devices with displays** at: www.fohnn.com/downloads
