  528SRM Internal Speaker Connections .............................. 21
A new 528 Series Microphone Station, when connected to the network, will boot up to screen Figure 1. Hold down the Shift Key and press “Enter” to go to Figure 2.

To change any information after the initial setup is complete, press and hold the Number 4 Key, then press the Number 6 Key. Figure 2 will appear.
Enter the microphone station number and press “Enter”. This will take you to Figure 3. If it has already been entered correctly, just press “Enter” to go to the next function.
Enter the Group Number of the ACS to which this microphone station is to be assigned, then press “Enter”. This will take you to Figure 4.

If it has already been entered correctly, just press “Enter” to go to the next function.
Enter the microphone station’s location such as “Gate 21 Jetway”. The Location name can have a maximum of 16 characters. To enter letters, hold the Shift Key down and select a letter. Press the key with the desired letter the number of times corresponding to its position on the key. For example, if the letter is in the second position, press the key twice in rapid succession for that letter. Then release the Shift Key.

The Annc/0 Key will produce a space. Delete characters by backspacing over them. To backspace, hold down the Shift Key and press “Enter”.

When finished entering the location, press “Enter”. Figure 5 will appear.

If it has already been entered correctly, just press “Enter” to go to the next function.
If all information is correct, press “Enter” and Figure 6 will appear. If any of the information is not correct, hold the Shift Key down and press “Enter”. This will take you back to Figure 2 where you can re-enter any incorrect information.
To change or enter the IP Address, hold the Shift Key down and press “Enter”. Figure 7 will appear.

IF the IP Address is correct, just press “Enter” and screen #8 will appear.
Enter the IP Address for this microphone station such as "10.2.128.2". To enter a dot (.), hold the Shift Key down and press the number 1. To backspace, hold the Shift Key down and press "Enter". When you are finished, press "Enter". Figure 8 will appear.
To change or enter the Subnet Mask, hold the Shift Key down and press “Enter”. Figure 9 will appear. If the Subnet Mask is correct, just press “Enter” and screen #10 will appear.
Enter the Subnet Mask for this microphone station, such as “255.0.0.0” (do not enter the quotation marks). To enter a dot (.), hold the Shift Key down and press the number 1. To backspace, hold the Shift Key down and press “Enter”. When you are finished, press “Enter”. Figure 10 will appear.
This screen shows the LAN MAC address for this microphone station. The LAN MAC address cannot be changed. Press “Enter” and Figure 11 will appear.
This is the Serial Number for the microphone station. It is entered at the factory and cannot be changed. Press “Enter” and Figure 12 will appear.
This screen shows the firmware version and date entered in flash for this microphone station. Press “Enter” and Figure 13 will appear.
This screen will appear until the microphone station is linked to its ACS. If the screen appears for more than 60 seconds, check the ACS Toolset for correct microphone station setup. The ACS must be running.

This screen will also appear if invalid information was entered during setup.

To change any information after the initial setup is complete, press and hold the Number 4 Key, then press the Number 6 Key. Figure 5 will appear. Hold the Shift Key down and press “Enter”. Figure 15 will appear.
