

Audio System Gain Structure: Maximizing Your Audio Signal Chain

COURSE DESCRIPTION

This course is for anyone just entering the AV field or someone with years of experience that may have gaps in their knowledge base. From identifying basic audio signal types to setting gain structure on audio systems, this course will assist anyone with setup and troubleshooting of basic and more complex audio systems.

LEARNING OBJECTIVES

At the end of this course, the participant will be able to:

- Define the different types of audio signals in a typical commercial audio system.
- Set the gain structure on a simple sound reinforcement system.
- Set the gain structure on a more complex audio system using simple test equipment.
- Identify signal distortion and clipping within an audio system
