

FOHNN[®] **TEXTURE DESIGN**

TEXTURAL EFFECT DESIGNS FOR
FOHNN[®] LINE SOURCE LOUDSPEAKERS
WITH ALUMINIUM HOUSING

NEW DESIGN POSSIBILITIES

FOHNN® has always placed great importance on clear, unobtrusive design, as well as on achieving perfect visual integration of its loudspeakers into the relevant architectural setting. In 2016, the company goes a step further with the introduction of **FOHNN® TEXTURE DESIGN**.

A new, exclusive process of coating and lacquering loudspeakers (to industry standards) takes architectural integration to the next level. With a wide variety of high-quality textural effect designs now available, even the most diverse

design specifications from architects and planners can be met. The designs, all with photo-realistic appearances, range from stainless steel and carbon to marble, as well as various wood effects.

FOHNN® TEXTURE DESIGN will initially be available for **FOHNN®** line source loudspeakers with aluminium housings up to a maximum length of 1.5 metres. These include models from the **LINEA LX**, **LINEA FOCUS** and **LINEA LEN SERIES**, as well as **AIREA** loudspeakers.

FOHNN® TEXTURE DESIGN AT A GLANCE:

- integration into room architecture
- numerous high-quality designs with photo-realistic appearances: stainless steel, carbon, marble, oak.
- supplied in semi-matt finish – high gloss finish available on request
- a special top coating ensures maximum UV resistance
- highly durable, fast surface due to multiple layers of lacquer over the design
- brackets available in **RAL** colours that match the basic tone of the texture design
- available for line source loudspeakers with aluminium housing, up to 1.5 metres in length:

LINEA LX: LX-10/11, LX-60/61, LX-100, LX-150

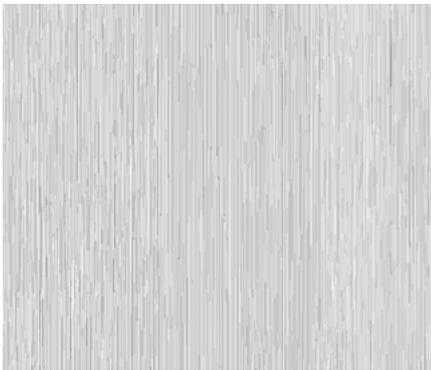

LINEA FOCUS: LF/I-120

LINEA LEN: LEN-20, LEN-60, LEN-100, LEN-150

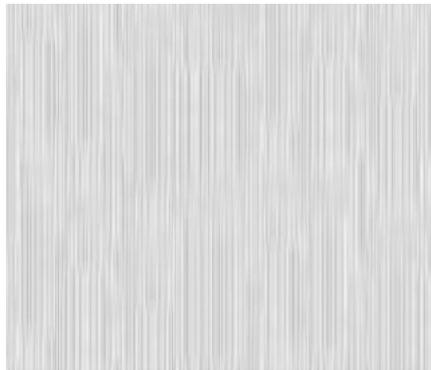

AIREA: LX-10 ASX, LX-20 ASX, LX-60 ASX
