

DMA/LMA

AMPLIFIER SERIES

The **DMA** is a smart “mixer-amplifier” for a single zone that is configurable through an iOS/Android app. Onboard DSP allows for simple audio adjustments and application of AtlasIED speaker tunings. Along with multiple on-board audio inputs, the DMA can accept remote WTSD audio wall plates. Source selection and volume adjustments can be made through either the front panel interface, or by connecting a simple wall controller.

The **LMA** is a single channel amplifier that can be used as a standalone mono amplifier or paired with a DMA to create a cohesive two channel system for use as a Zone 2, Subwoofer, or Zone 1 Expansion.

FEATURES/BENEFITS

DMA

Simple DSP Configurable Via Mobile App

The AtlasIED DMA Control mobile app for iOS and Android allows access to the onboard DSP for simple audio adjustments and application of AtlasIED speaker tunings during initial configuration.

Compatible With DMA Controller Accessories

The DMA series are compatible with volume and source/volume wall controllers as well as remote audio inputs such as Bluetooth and XLR.

LMA

Three Available Power Levels (100/200/400W)

Both the DMA and LMA series are available in 100W, 200W, and 400W models and are multi-impedance capable (4/8Ω, 70/100V) to accommodate a variety of installations.

DMA Compatible For Zone 2 Expansion

An LMA series amplifier can be used as standalone mono amplifier or paired with a DMA series amplifier to create a cohesive, two-channel system for use as a Zone 2, Subwoofer, or Zone 1 Expansion.

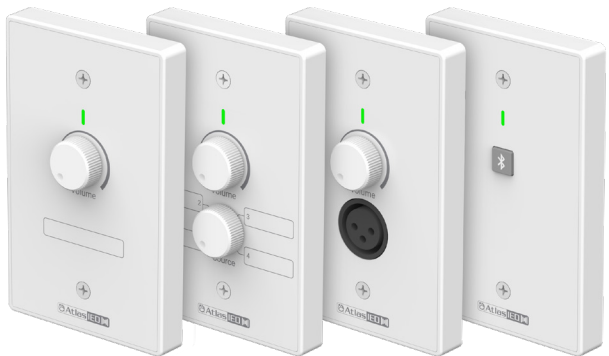

DMA AMPLIFIER SERIES

The **DMA** single channel mixer-amplifiers are available in 100W, 200W, and 400W versions all with a front panel LCD for easy user engagement. With built in DSP and simple app-based configuration, these amplifiers offer scalable audio control for a variety of applications from retail to hospitality, and presentation rooms to waiting rooms.

LMA AMPLIFIER SERIES

The **LMA** is a high-power, multi-impedance, single channel amplifier available in 100W, 200W, and 400W versions. When linked to a DMA amplifier, the LMA expands the audio control and capabilities to a two channel system.

ACCESSORIES

DMA wall-mount accessories offer a variety of audio management tools for **DMA** and **LMA** amplifiers. Volume, volume and source, Bluetooth, and XLR mic input options ensure that users get the most out of their DMA/ LMA system. All wallplates fit into single gang boxes for easy integration into all spaces.
